MD On-Line, Inc. Forges Alliance With InstantDx's OnCallData™ Electronic Prescribing Service

Partnership Combines Electronic Healthcare Transaction Processing with Electronic Prescribing Software, Adding Greater Speed And Accuracy To Physicians' Practices

Parsippany, NJ - June 16, 2006 - MD On-Line, Inc., a leading technology company focused on providing innovative products for electronic healthcare transactions between providers and payers, has forged an alliance with InstantDx, whose OnCallData™ electronic prescribing software allows doctors to send and refill prescriptions in pharmacies across the country. MD On-Line, Inc. will market, promote and sell this new integrated service as a cost- and time-saving solution for medical professionals and office administrators.

According to Bill Bartzak, President and CEO of MD On-Line, "OnCallData is a perfect complement to our core business, and represents another way for us to help medical professionals operate their businesses more efficiently and effectively." He added, "The tens of thousands of medical professionals who today are using our core services already recognize the cost and time benefits of the system, and we expect that they will quickly see the added benefits of extending their electronic processes to include prescription writing."

InstantDx's OnCallData system allows doctors to electronically send prescriptions and refills in seconds to over 72,000 pharmacies across the country. OnCallData integrates seamlessly into most doctors' practice management systems, enabling doctors to securely write electronic prescriptions using personal computers, PDAs or other Internet-connected devices. Before the patient even steps into the pharmacy, the OnCallData software automatically checks insurance eligibility, formulary restrictions, drug interactions and more.

Dr. Allan Weinstein, Chairman and CEO of InstantDx, said, “Both MD On-Line and InstantDx allow doctors and medical staff to do more of what they do best --care for patients.” He added, “Activities that used to take 2-6 hours a day can now be accomplished in a fraction of that time, with a higher degree of accuracy, security and instant approval. Not only is this good for the doctor, it is of significant benefit to patients.”

This innovative partnership between these two privately-owned companies advances America’s trend toward electronic medical recordkeeping and offers more online services for healthcare professionals and administrators. MD On-Line and InstantDx will continue to be the leaders in developing technologies that add greater efficiencies, safety and savings to patient care.

About MD On-Line, Inc

Founded in 1995, MD On-Line, Inc. is a healthcare technology company focused on “Transacting the Business of Healthcare”. The company provides solutions fostering connectivity between healthcare payers and providers to facilitate transactions and reduce related costs. Privately-held, the company processes in excess of two million electronic transactions per month, and is the preferred solution provider for some of the largest medical insurance companies in the country. With offices in New Jersey and California, MD On-Line has been named to the Inc. 500 list of the fastest growing companies in America, and has twice been included on the Deloitte & Touche Fast 500 and New Jersey Technology Fast 50 list of companies.
